

José Miguel Tejedor Fernández

Server Data Engineer at Rovio Entertainment Ltd.

May 20, 2012, José Miguel worked with Andrew on the same team.

I had the pleasure to work with Andrew throughout more than a year. It was incredible his wide background and deep knowledge about telecommunications and SW development industry. The time we work together he performed with outstanding results for the company.

After Accenture I also had the opportunity to meet him when he was running his own internet business. Andrew has a resulted-oriented entrepreneurship vision ready to discuss new ideas especially on the field of technology and the internet.

Not only an impressive curriculum but he also has amazing social skills. Andrew is an excellent team player, always willing to help to any colleague and build the ideal atmosphere. And the most important, Andrew is a very ethical man and would make a good leader and fit any position of responsibility. I definitely recommend Andrew for any position of responsibility which requires talent and skills.
